About Onskill

ONSKILL

OnSkill is an AI-powered assessment and certification platform designed to bridge the gap between learning and employability.

Built to help learners, institutions, and employers evaluate real-world skills, OnSkill offers intelligent assessments, industry-recognized certifications, and data-driven skill validation across diverse domains and emerging technologies.

Our mission is simple: empower individuals to showcase their true capabilities, help organizations identify qualified talent, and create a trusted ecosystem where skills matter more than credentials alone.

This is just the beginning.

ONSKILL

Our Mission

Mission is the final stage of your AI Mastery journey, where you'll take everything you've earned and apply it to a real-world challenge.

You'll define practical problem, work with real data, build and evaluate your own AI solution, and present your work like a professional AI Warrior.

Founder's Message

ONSKILL

Harneet Singh

Rabbitt AI

Dear Students,

I've been on both sides of the table—first as a curious student diving into AI, searching for real learning, and later, as an AI consultant building solutions for the South Korean Navy and leading AI operations at scale..

Back in 2023 when everyone was just accepting ChatGPT supremacy
We challenged & set out to create our own SLMs (Custom fine-tuned models)
Invented Chance RAG: fusion of Google-type Search and Vector Search
Delivered impact for 70+ Fortune 500 Companies, International Defence and Healthcare Organisations and Ivy League Universities and governments across 4 continents.

We helped organizations own their data and helping them become landlords of AI when renting looked like an easier way.

But we are Hungry

We are hungry for adding value to our customers and our nation.

Setting up first ever AI Centre of Excellence (CoE) in India.

We summarized 10,000 hours of AI Expertise from Industry leaders.

Created Practical and Application oriented learning playbook.

Launched a Gen AI Book, AI NAMA for CXOs & Business Leaders.

To upskill the next gen of leaders in AI, we launched Rabbitt Learning

We have already crossed 1 lakh+ people.

Hungry for creating 1 million AI-powered learners now.

That's why we created the Rabbitt Learning Generative AI Cohort.

This isn't just a course. It's a movement to empower 1,000+ students

to not only learn cutting-edge GenAI tools, but to build real-world

projects, contribute to open-source, and

showcase portfolios that get them noticed by

top startups and enterprises.

Welcome to Rabbitt Learning, where your

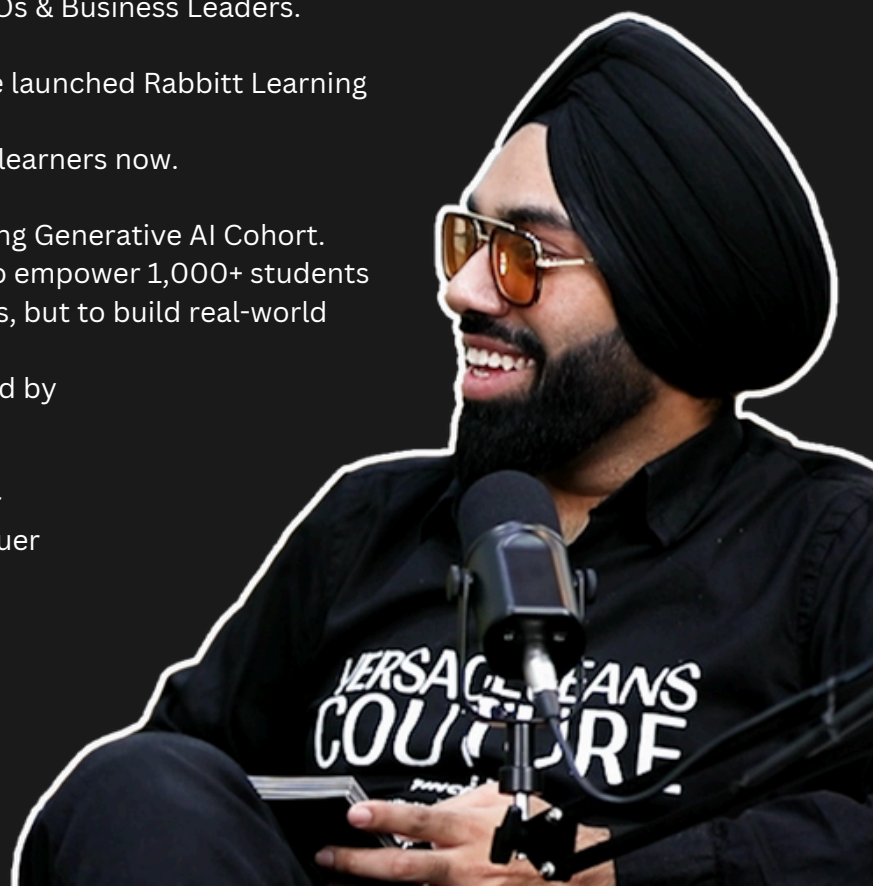

journey to becoming a Rabbitt Entrepreneur

begins.

Best regards,

Harneet Singh

Founder & Chief AI Officer

GenAI Master Certification

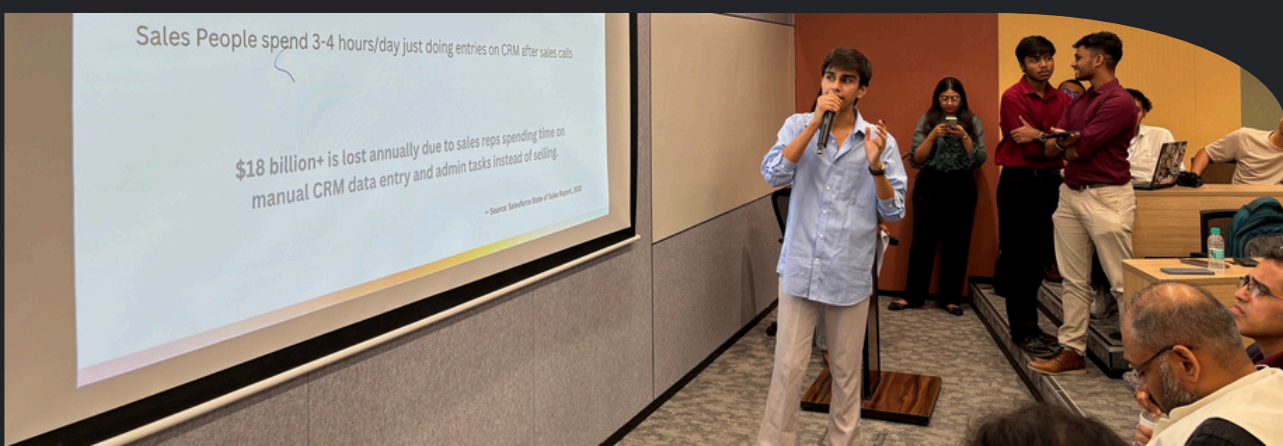

It is made for ?

ONSKILL

- **Students & Freshers Building Career-Ready Skills** – Ideal for students and fresh graduates who want to strengthen their skills, earn certifications, and stand out in the job market.
- **Working Professionals Upskilling & Advancing** – Designed for professionals looking to upgrade their skills, validate expertise, and accelerate career growth.
- **Employers & Teams Hiring with Confidence** – Perfect for organizations that want to assess, certify, and hire top talent based on real skills and performance.
- **Training Institutes & Educators** – For institutes and educators to deliver assessments, track learner progress, and issue industry-recognized certifications.

Sales People spend 3-4 hours/day just doing entries on CRM after sales calls

\$18 billion+ is lost annually due to sales reps spending time on manual CRM data entry and admin tasks instead of selling.

Step 6

Grab the Belt, Take Your Seat

Certification & job readiness.

Earn trusted certifications and stand out to employers with proven expertise.

Spread Your Wings

Your journey begins here.

How to Enroll ?

Skills Alone Aren't Enough—Proof Matters

**A degree may open doors.
Skills help you perform.
But verified skills build trust.**

Today, employers are looking beyond resumes and searching for candidates who can demonstrate real capabilities.

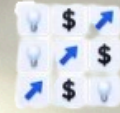

**Students are competing globally.
Professionals are constantly upskilling.
Organizations are hiring based on proven skills
and measurable outcomes.**

So here's our question to you:

Can you prove what you know?

At OnSkill, we've built a platform that helps individuals validate their skills, earn trusted certifications, and showcase their expertise with confidence.

This is more than an assessment platform. It's your pathway to credibility, growth, and opportunity.

ONSKILL

Why this cohort is the right choice for you?

We are living through a once-in-a-century tech shift.

Companies like OpenAI, Google DeepMind, Meta, and Anthropic are releasing new LLMs every 60 days.

AI roles are among the fastest-growing jobs on LinkedIn globally.

Tools like ChatGPT, Midjourney, and Copilot and many more are reshaping productivity across every field.

Startups are being built in dorm rooms with GenAI as the core engine.

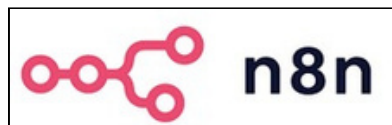

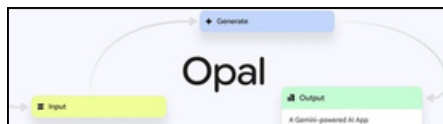

The world doesn't need more passive learners. It needs active builders.

If you've been waiting for the right time to start learning AI this is it.

ONSKILL

Tools and Framework You'll Master
